The Permanent Representation of Italy is pleased to announce the webinar “Secrets of the tomato - Exploring the cultural roots, health benefits and economic potential of that wonderful little fruit called the tomato”, on February 2nd 2022 as part of the initiative “Mediterranean Diet’s Principles for Agenda 2030” co-organized with FAO’s GIAHS Secretariat. This series of thematic sessions aims to raise awareness about how the Mediterranean Diet contributes to the achievement of the Sustainable Development Goals (SDGs).

The event is relevant to the International Year of Fruit and Vegetables which was celebrated last year and will focus on small-scale tomato production and the economic, social and health benefits linked to the little red fruit. The webinar will explore the importance of resilient value chains and local markets to ensure food security in face of shocks and crises.
